How to Write Articles-

Here are a few basic steps to take to craft an interesting, informative article.

Method 1 of 3: Come Up With An Idea

1. Get to know your audience. Decide who you need to write for before proceeding with planning or writing an article. Identify the needs of your readership. What do your readers need to know? How does your own knowledge match up against the information they need? This will be the easiest way for you to find a topic to write about
2. Be unique. If you are writing an article about something that other people are also writing about, try to be unique in how you approach the material
3. Be passionate. You should care about the topic you choose to write about. Your enthusiasm will show in your writing and it will be much more engaging for your readers

Method 2 of 3: Research Your Idea

1. Learn the basics. Get the general explanation of whatever you are trying to write about. This will give you a basic framework for what to look for as you research.
2. Find reliable sources. Now that you know what to look for, research your topic. You can use the internet, a library, conduct interviews, watch documentaries, or whatever you feel is appropriate to teach you everything you need to know about your topic. Be an expert!
3. Get different types of material. During your research, look for material that isn't text. This can be used or altered to add to your article.

Method 3 of 3: Write Your Article

1. Decide your length. Does this article have a word count? Do you need to fill a certain number of pages? Consider what type of content you're writing about and how much space that can fill, as well as how much needs to be written in order to cover the topic adequately, before proceeding with writing your article.
2. Outline your article. Before you begin formal writing, you will want to outline your article.
3. Edit your work. Before you submit your work, you will want to do some editing and revision. If time allows, wait for a day or two before editing
4. Respect the rights of other writers. If you are using information from an external source, be sure to cite the source at the bottom of the article.
5. Submit your work. When you've finished, submit your work in the appropriate manner.

Happy Writing.....

Happy Writing.....

ABSTRACT:

The paper is an attempt to study the North India migration, role of migrants in the economy, question identity transformation in the Hills districts of Assam. It were the North Indian migrants who brought the Commercialization of agricultural production in these two districts and brought changes and some time transformed the economic life of both indigenous and the migrants and migrants became economically dominant.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

The Present hills districts of Assam i.e. Karbi Anglong and North Cachar Hills came into existence as United Mikir and North Cachar Hills District on the 17th November 1951. The United Mikir and North Cachar Hills District was created after carving out certain districts of present Assam and Meghalaya. The United district was created after carving out present Golaghat, Nagaon and Cachar of Assam and United Khasi and Jaintia Hill district of present Meghalaya.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

OVERVIEW:

- Karbi Anglong and North Cachar Hills
- Migration in the Hill Districts
- Field of North Indian Migrants in Hills Districts
- The Existing Mode of Cultivation in the Area
- Migrants, Individual ownership and commercialization
- Legality and the Question of Migrant's Identity

Overview Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

CONCLUSION:

The red to brown coloured binuclear cobalt (II) complexes have general formula $[(ML)_2Cl_2]$, where 'L' is a Schiff base molecule. With the help of elemental analysis data, conductivity measurements, electronic spectral data and infrared spectral data and magnetic susceptibility of complexes it may be suggested that the complexes have coordination number six with a planar to pseudotetrahedral structure.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
