ABSTRACT

People on globe are under tremendous threat due to undesired change in the physical, chemical and biological characteristics of water. Due to increased human population, use of fertilizers and man-made activity water is highly polluted with different harmful contaminants. Natural water contaminants due to weathering of rocks and leaching of soil etc. it necessary that the quality of drinking of water should be checked of regular time interval, because due to use of contaminated drinking water.

Introduction

A hydrosphere word is derived from the two different word Greek-hydor “Water” and sphaira “sphere”. In physical geography describes the collective mass at water found on under and over the surface of a earth planet.

A Good Introduction :-

Importance of the expected results to the general inqu Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

Water samples from the selected spots were collected and analysed by the standard protocol method mention below.

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. Inc or supplies that are not generally found in research centers.

Result

After analysis of all selected parameters results were obtained. In this project we have taken surface and ground water for the monitoring and determined the extent of Pollutant.

A Good Result :-

Results are as per aims and objective and useful to further research .

Conclusion

The selected spots are Kotla Maidan well (TK), Dewan Talab (TD), Nigarbandh Pond (TN), Tirkripara School well (TT), Tonhi dabri Pond (TTN). Near Tikripara School well (TNT), Neal Kotla maidan well (TNK).

A Good Conclusion :-

Thus, the research have wider scope for new academician and research scholars.

HOW TO INCREASE API

Services for Associate Professor to Professor

- ★ Thesis convert into book. Publish in USA - 50 API Marks
- ★ 15 Articles from your Ph.D thesis - 150 API Marks
- ★ UGC Minor Research Project - 10 API Marks
- ★ UGC Major Research Project - 15 API Marks
- ★ Call for Book Chapter - 25 API Marks
- ★ 5 Seminar Paper presentation - 50 API Marks
(we organize)

REVIEWER COMMENTS

- The presentation is pertinent and hypothesis based.
- Sufficient data about the past study discoveries is displayed for perusers to take after the present study method of reasoning and strategies.
