ABSTRACT

Construction is dynamic industry which is attracted by many unskilled workers including women. In case of construction works, the contractors are exploiting and discriminating women workers. Hence, socio-economic conditions of the women construction workers are analyzed by collecting primary data through interview schedules from total 200 women construction workers in Kalaburagi city.

### Introduction

The construction industry has several features that, distinguish it from most other industries so far as the status and welfare of the workers is concerned. The majority of construction sites are of a temporary nature, since most structures require little attention of construction workers once construction is completed.

#### A Good Introduction :-

*Importance of the expected results to the general inquiry. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.*

### Materials

The present study is made in Kalaburagi city. Kalaburagi city is located in Hyderabad-Karnataka backward region. The authors observed the working and living conditions of women construction workers and based on their observation, totally 200 women construction workers were interviewed to collect the primary data.

#### A Good Materials :-

*Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. Inc or supplies that are not generally found in research centers.*

### Result

Must add result in your article.

#### A Good Result :-

*Results are as per aims and objective and useful to further research.*

### Conclusion

Normally construction workers are employed through contractors, who exploit them for their benefits. Though there are various protective enactments for these workers, but ground realities are totally opposite from legal provisions on the subject. Contractors employ these workers till they remain capable of performing the assigned tasks.

#### A Good Conclusion :-

*Thus, the research has wider scope for new academicians and research scholars.*

#### REVIEWER COMMENTS

- This was a superb give an account of extremely intensive examination.
- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
