ABSTRACT

Biological control mainly consists of using microorganisms to control harmful microorganisms causing plant disease without disturbing the ecological balance. Weindling (1932) suggested potential use of *Trichoderma* spp. as a biocontrol agent against the soil borne plant pathogens like *Rhizoctonia solani*. The biological control of root diseases of crop plants by introduction of antagonistic microorganism has been suggested as an environmentally safer alternative to the use of fungi toxic chemicals (Baker and Cook, 1974)

Introduction

Trichoderma is a genus of filamentous deuteromycetes. Its members are generally found in all soil including forest humus layer as well as in agricultural & orchid soils (Wardle, Parkinson & Waller, 1993).

A Good Introduction :-

Importance of the expected results to the general inquiry. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

Four soil samples of 500 grams each were collected randomly from top six-inch layer of soil from each agro climatic zone of Karnataka and packed in polyethylene bag.

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. Include or supplies that are not generally found in research centers.

Result

Must add result in your article.

A Good Result :-

Results are as per aims and objective and useful to further research.

Conclusion

Trichoderma spp. is the most widely studied biocontrol agents (BCAs) against plant pathogens because of their ability to reduce the population of soil borne plant pathogens (Papavizas, 1985). In the present investigation, Trichoderma harzianum, a biocontrol agent was isolated from various agro climatic zones of Karnataka.

A Good Conclusion :-

Thus, the research has wider scope for new academicians and research scholars.

HOW TO INCREASE API

Services for Associate Professor to Professor

- ★ Thesis convert into book.Publish in USA - 50 API Marks
- ★ 15 Articles from your Ph.D thesis - 150 API Marks
- ★ UGC Minor Research Project - 10 API Marks
- ★ UGC Major Research Project - 15 API Marks
- ★ Call for Book Chapter - 25 API Marks
- ★ 5 Seminar Paper presentation - 50 API Marks
(we organize)

REVIEWER COMMENTS

- The presentation is pertinent and hypothesis based.
- Sufficient data about the past study discoveries is displayed for perusers to take after the present study method of reasoning and strategies.
