ABSTRACT

The existing cropping pattern and crop productivity of watershed was studied according to land use and discussions were made with farmers regarding improvement and adaptability of the new crop packages and technology. To study the socio-economic status of watershed, the data pertaining to socio-economic condition of the farmers has been collected. A technical questionnaire has been developed to collect the information on various aspects by personal interview method and analyzed by simple tubular method.

Review of the Article:

The present study focuses on Effect Of Watershed Development Program On Cropping Pattern, Crop Productivity And Socioeconomic Status Of Karwadi- Nandapur Watershed . The introduction builds a logical case and context for the problem statement. The problem statement is clear and well articulated.

Abstract:

The abstract is complete, essential details are presented. The results in the abstract are presented in sufficient and specific detail. The conclusions in the abstract are justified by the information in the abstract and the text. There are no inconsistencies in detail between the abstract and the text.

Reference to the Literature and Documentation:

The literature review is up-to-date. The number of references are appropriate and their selection is judicious. The review of the literature is well integrated.

Instrumentation, Data Collection:

The measurement instrument is appropriate given the study's variables; the scoring method is clearly defined. The data set is sufficiently described.

Data Analysis and Statistics:

Data analysis procedures are sufficiently described, and are sufficiently detailed. Data analysis procedures conform to the research design; models, or theory drives the data analyses.

Presentation and Documentation:

The text is well written and easy to follow. The vocabulary is appropriate. The content is complete and fully congruent.

Scientific Conduct:

There are no instances of plagiarism. Ideas and materials of others are correctly attributed.

References:

References are mentioned in APA Style.

Relevance:

The study is relevant to the mission of the journal or its audience. The study addresses important problems or issues; the study is worth doing. The study adds to the literature already available on the subject.

SUMMARY OF ARTICLE

| No. | | Very High | High | Average | Low | Very Low |
|-----|--|-----------|------|---------|-----|----------|
| 1. | Interest of the topic to the readers | ✓ | | | | |
| 2. | Originally & Novelty of the ideas | | ✓ | | | |
| 3. | Importance of the proposed ideas | | ✓ | | | |
| 4. | Timelines | ✓ | | | | |
| 5. | Sufficient information to support the assertions made & conclusion drawn | | | ✓ | | |
| 6. | Quality of writing (Organization, Clarity, Accuracy Grammer) | | ✓ | | | |
| 7. | References & Citation (Up-to-date, Appropriate Sufficient) | ✓ | | | | |

FUTURE RESEARCH SCOPE:

- 1.Understanding complex water systems
2. Socio-technical interplay of water systems
- 3.Water and sanitation and society
4. Water storage and society
- 5.Anticipating climate change adaptation: scale effects of water storage on governance

HOW TO INCREASE API**Services for Associate Professor to Professor**

| | |
|--|---------------|
| Thesis convert into book.Publish in USA | 50 API Marks |
| 15 Articles from your Ph.D thesis | 150 API Marks |
| UGC Minor Research Project | 10 API Marks |
| UGC Major Research Project | 15 API Marks |
| Call for Book Chapter | 25 API Marks |
| 5 Seminar Paper presentation (we organize) | 50 API Marks |
