ABSTRACT

Marital satisfaction is one of the main mental issues in Mizoram and many other parts of the world. It is related to age, occupation, gender, age of marriage, length of marriage, working status and number of offspring. There have been no previous studies conducted on this subject in the state. The data used is primary data collected from a sample size of 704 by well-trained researchers and this article illustrates the broad pattern of marital satisfaction level. Marital satisfaction level in males (100.73) is higher than in females (98.74), which is also
