ABSTRACT

The present study intends to analyze the socio-economic development in Sangli district of Maharashtra. It is mainly based on secondary sources of data mainly collected from the census of India, 2011 and Socio-Economic Abstract, 2012. Measurement of levels of development is very important in today's world because it helps in future planning of the region. Therefore, for the measurement of development Prof. Kundu's method (1980) normalization method has been used. The total population of Sangli district was 28, 22,143 in 2011.
