A Study On Importance Of Education For Nation Building: Indian Context

Pratisha Padmasri Deka

ABSTRACT:

The problem statement was clear and well articulated Through this paper an attempt has been made to highlight education as a vital factor for nation building and national development. The long-term target of building societies which are structurally able to create and maintain peace has gained considerable currency. Human capital development is something that must exist or happen for development of society and nation. Nations stay together when citizens share enough values and preferences

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation "There cannot be a firmly established political state unless there is a teaching body with definitely recognized principles. If the child is not taught from infancy that he ought to be a republican or a monarchist, a Catholic or a free-thinker, the state will not constitute a nation; it will rest on uncertain and shifting foundations; and it will be constantly exposed to disorder and change."

METHODOLOGY:

The present study was exclusively realized on secondary data sources. It was purely descriptive type of research since it describes the facts relating to the problem. This paper is based on secondary data and Information that has been sourced from various books, educational journals, government publications, newspapers etc. and research is descriptive in nature. Hence, This study employed a qualitative research design.

PRESENTATION OF RESULTS:

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text For nation-building, both, the beginning and the end are important, since the beginning might bear already the solution or the obstacles to solve a conflict. When beginning is considered it is worth mentioning that the Indian nation successfully solved the problem of rehabilitating some ten million people, the biggest in human history - who had been uprooted from their hearths and homes in the wake of partition of India during 1940`s .

REFERENCES:

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

RELEVANCE:

The study was relevant to the mission of the journal or its audience. The study addresses important problems or issues; the study was worth doing.
