ARTICLE REVIEW REPORT

The Influence Of Peer Attachment On The Self-esteem Of Adolescents

Sunita and Pinki Rani

ABSTRACT:

The problem statement was clear and well articulated Peer attachments play a very important role in determining high self-esteem of students. Self-esteem can be defined as an individual's attitude about him or herself, involving self-evaluation along a positive- negative dimension. Most generally self-esteem refers to an individual's over all positive evaluation to the self. The study was conducted in Hisar District of Haryana state.

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation Self esteem continues to be one of the most commonly research concept in social psychology (Baumeister, 1993). Teachers, administrators and parents are commonly concerned about student's self-esteem. Its significance is often exaggerated to the extent that low self-esteem is viewed as the cause of all evil and high self-esteem as the cause of all good (Manning et al., 2006). Self-esteem is associated with depression, anxiety, motivation and general satisfaction with one's life (Rosenberg, 1986).

METHODOLOGY:

The present study was exclusively realized on secondary data sources. It was purely descriptive type of research since it describes the facts relating to the problem. The study was planned to investigating levels of Self-Esteem among adolescents living in rural and urban areas. To understand the features of adolescents, comparative rural and urban area study is an essential tool. As per objectives, the study was conducted in Hisar district of Haryana state purposively selected due to easy accessibility.

PRESENTATION OF RESULTS:

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text The results indicated that peers attachment indicated significant differences. Peers attachment was higher than both parent attachments. Although traditional attachment theory has generally promoted the influence of parents in a child representation of relationships
