Abstract:

In the wider sense, Education includes the development from infancy to maturity. Education may be defined as a progress of reconstruction of Experiences. Therefore, the education is known as the maker of the man, nation builder etc. The main function of education is not only the enable people to adjust to their environment as per necessity to the end that the greatest and most enduring satisfaction may be occurring to each person and to the society. The school will have to provide such vital experiences as may help the individual develop the art of living together. Education is known concern with the growth and the development of the whole person.

The modern aim of the education is the wholesome, balanced or harmonious development of Personality. Personality is the open and run of psychology and education. The sign of life is struggle for growth. A tiny seed breaks open the earth to grow in to a plant, but growth alone doesn't add beauty to life, rather wild and abnormal growth sometimes leads to stagnation. Shaping the growth through proper training and systematic discipline is the only way to make life beautiful, which ultimately leads to fully-fledged Personality.

Globalization has given new dimension to Education. Today, educational activists accept that student is center of Education system. That's why it is important for us to study how student notices the education system. Here Researcher is going to make review of students' views about Secondary Education system here.

OBJECTIVES OF THE STUDY:
