Abstract:

Every era has own problems and own solutions. The history of human being is used to follow that particular rule. The society contains two types of core groups. One group supports new systems and other group makes efforts to oppose it. The contemporary era is not exception for that situation.

When we think about education, teacher education or any aspect of education on the desk of contemporary era; we have to think properly. It means we should not follow European countries totally. Firstly we should study our nation's social, cultural, political, financial, geographical situation.
