### Abstract:

*The purpose of the study was to compare the socio-economic status between Kabaddi and Football Players participation in Intercollegiate Competition. The objective of the study was to find out whether there is any significant difference in the socio-economic status of Kabaddi and Football Players participation in Intercollegiate Competition For the purpose of this study 30 Kabaddi players and 30 Football players were selected as a sample who participated in Intercollegiate Competition of S.G.B .Amravati University, Amravati (M.S.) Subjects was selected using Simple Random Sampling Method for this study. The research Scholar selected Socio-economic status Scale for Kabaddi and Football Players. Socio-economic status. Questionnaire developed by National Psychological Corporation, Agra made by Rajiv Lochan Bharadwaj (Socio-economic status Scale) To assess the Socio-economic status measure and compare Kabaddi and Football Players who participated in Intercollegiate Competition and find out the status of Socio-economic of Kabaddi and Football players. From the statistical analysis it is quite clear that Kabaddi and Football players does not difference significantly with respect to their Social status but significantly with respect to their Economical status and Socio-economical status.*

### KEYWORDS:

Socio-economic status of Kabaddi and Football Players

### INTRODUCTION :

Socio-economic status is an important factor in sports success and sport is an important ingredient in a democratic society. An individual's socio-economic status may influence his opportunity for opportunity, his desire to excel his choice of activity and his success. A player's progress may enhance his social prestige and acceptance by his peers.

The home environment of the influences motivate him to succeed in sports and the degree to which success in this endeavor leads to inner satisfaction. Man are usually influenced by some component of the social climate. When engaging in physical activities. Every individual who competes in sport competition is not involved in physical intersection only but sport participation is a form of social interaction also. Sport is a social phenomenon of great magnitude. The general cultural setting determines an individual's selection of the physical activity or sport. Sport is recognized as an element of culture. According to Freud, "As civilization involves the social and psychological characteristics of man tend to replace the physical and biological characteristics as determinates of behavior where there is a little question that socio-psychological factor exert a greater force upon the Natural and extent of sport and physical activity then biomechanical or physiological factor. Socio-economic status of the group and the status of an individual in his influence competitive and co-operative, behavior. An individual form lower

class competes for different reason and for different things form those motivating people in the middle and upper economic groups.

**OBJECTIVE :**

The objective of the study was to find out the difference of socio-economic status of Kabaddi and Football Players.

**SIGNIFICANCE OF THE STUDY :**

The result of the study would help the coaches, physical education teachers to understand the socio-economic status of Kabaddi and Football Players.

1.It might be helpful to the trainees to solve and improve socio-economic status problem.

**Hypothesis:**

It was hypothesized that may have difference of socio-economic status of Kabaddi and Football Players.

**Selection of Variable :**

The present study the following variable were selected.

1.socio-economic status

**METHODOLOGY :**

The required data were collected from participation in Intercollegiate Competition level of Sant Gadge Baba Amravati University Amravati of Kabaddi and Football players. For the purpose of this study 30 Kabaddi players and 30 Football players were selected who participated in Intercollegiate Competition of S.G.B. Amravati University, Amravati. Subjects were selected by using Simple Random Sampling Method . The research scholar selected to collect data pertaining to the study of Socio-economic status were assessed by standard questionnaire and score was noted down in numerical from- questionnaire of “ Socio-economic status was measured by using National Psychological Corporation, Agra made by Rajiv Lochan Bharadwaj (Socio-economic Inventory) Purpose To assess the Socio-economic status measure and compare the Kabaddi and Football players Before distribute the questionnaire to the selected subject, they were requested to assemble at Place Intercollegiate Competition level of S. G .B. Amravati University Amravati of Kabaddi and Football players. After that the research scholar must explained the purpose of the study and the method how to fill up that questionnaire. The responses of the subject were converted into numerical with the help of the scoring key were give the score. A part from this required for the test are easily and readily available at the concerned Center. To compare the Socio-economic status of Kabaddi and Football Players who participation in Intercollegiate Competition Analysis of variance was used for analyzing the data. From the statistical analysis it is quite clear that Kabaddi and Football players does not difference significantly with respect to their Social status but significantly with respect to their Economical status and Socio-economical were observed, test was used for assessing the mean difference status.

**RESULT AND DISCUSSION :**

After getting the scores of socio-economic status of Kabaddi and Football players, 't' test was applied. The results obtained is presented in the following table.

### Summary of 't' Test of Socio-economic status of Kabaddi and Football players

Status	Players	Mean	Standard Deviation	Mean Difference	Standard Error	't' test
Social	Kabaddi	473.27	51.76	28.83	17.90	1.610@
	Football	502.10	83.29			
Economical	Kabaddi	257.77	121.19	80.80	39.32	2.055*
	Football	338.57	178.08			
Socio-economic	Kabaddi	731.03	137.21	109.63	46.00	2.383*
	Football	840.67	211.33			

@ Not Significance at 0.05 level.

\* Significance at 0.05 level.

$$t_{0.05(58)} = 2.0017$$

From the above table it is observed that Kabaddi and Football players in Social status the obtained 't' is 1.610 which is less than the tabulated  $t_{0.05(58)} = 2.0017$ , it is concluded that there is no significant difference in the social status scores of Kabaddi and Football players. But from the above table it is examined that Kabaddi and Football players in Economical status the obtained 't' is 2.055 and Socio-Economic status of Kabaddi and Football players obtained 't' is 2.383 are greater than the tabulated  $t_{0.05(58)} = 2.0017$ . Hence it is concluded that there is significant difference in the economical status and Socio-economic status scores of Kabaddi and Football players.

The means social status and economical status and Socio-economic status scores of Kabaddi and Football players are shown graphically depicted with the help of following figure.

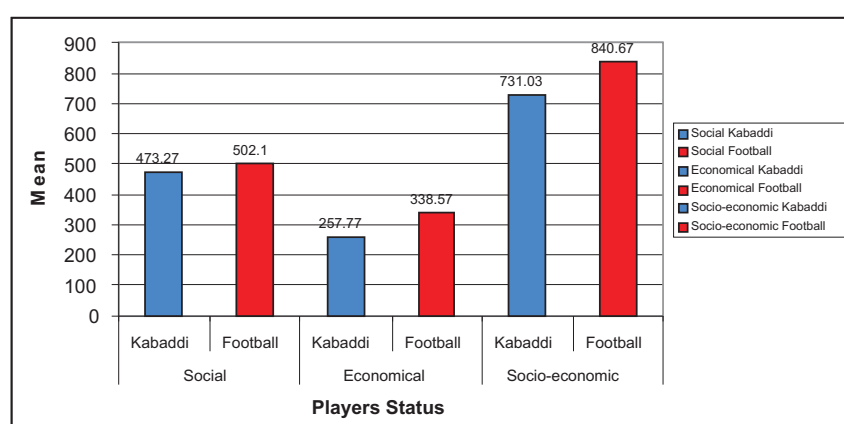

Figure 1- Showing the comparison of mean of Socio-economic status of Kabaddi and Football players

### CONCLUSION :

This paper highlights the Form the above statistical analysis it is quite clear that Kabaddi and Football players does not difference significantly This paper further shows that with respect to their Social status but significantly with respect to their Economical status and Socio-economical status. positive impact on enhancing the level of Players Socio-economical status of the respondents purposely selected for the study.
