### ABSTRACT

**T**he present paper aims at the study of tourist's behavior at Ganpatipule. Tourism is a basic and most desirable human activity describing the praise and encouragement of all people and government. For this paper primary and secondary data have been collected tabulated and analyzed with the help of statistical techniques.

**KEYWORDS:** Tourism, behavior pattern.

### INTRODUCTION :

Social Geography is a recent sub division developed mainly since 1947. The Geography of the Leisure

and Recreation is broad term often used synonymously with tourism. The fundamental difference between recreation and tourism seems to be travel factor.

Tourism is a basic and most desirable human activity deserving the praise and encouragement of all people and government. It is an industry concerned with attracting people to tourist destination.

As tourism is an activity, affects the economy of the destination areas, primarily a service industry in which employment is in tertiary activities. It is a labor-orientated industry provides direct and indirect employment to a large segment of population compare to other

pleasant in winter and the temperature often falls at night. Through Ganpatipule has very good weather throughout the year, advisable not to make a trip during the monsoon.
